

Example of redevelopment – Basel Station

By architects Antonio Cruz Villalón and Antonio Ortiz García

<http://www.cruzyortiz.com/>

Basel SBB was redesigned and enlarged from 1996 to 2003, a project conducted by [Cruz y Ortiz](#). More than just a pedestrian overpass, it is an almost 200-metres long public space that connects the two sides of the city, across the rails. It includes a footbridge of 9.000 m² and a parking of 14.700 m²
